Change Report — Delivery Preparation Bundle

Document	Change Report	Release	10/08/26 V1.0
Project	BRN WMS	Project code	200-WMS-26-001-00
Project period	05/01/26–24/08/26		

Section 2: Change Details

Description of the requested change: Bundle two related delivery-preparation changes: (1) replace corporate branding assets — logo (logo.png, logo.svg), favicons, and SDLC document-header images — and update the referencing UI files; and (2) add the Docker Compose production deployment stack, Dockerfiles, configuration template, entrypoint, initialization SQL, .env.example, and interactive .env initialization script.

Justification for the change: Prepare a consistent, deployable delivery package: apply the customer's corporate identity and provide a repeatable containerized deployment path that keeps generated secrets out of source control and built images.

Section 3: Impact Analysis

Item	Detail
Impact on Scope	Rebranding: 23 files changed (images and 11 PHP/CSS include files). Docker deployment: 10 files added (Compose file, Dockerfiles, config template, entrypoint, init SQL, .env.example, and init-env script).
Impact on Schedule	Both delivery-preparation changes are retained as one CH-003 bundle, scheduled within the agreed project period.
Impact on Budget/Cost	Not separately tracked.
Impact on Resource	Developer only.
Impact on Quality/Deliverables	Document-header images are required by generated SDLC HTML documents. Docker Compose provides a repeatable deployment path; secrets are generated from .env at container start and are not committed or baked into images.

Section 4: Change Advisory Board (CAB) Approval

No.	Reviewer Name	Position	Comments / Signature
