

Document	Software	Release	17/08/26 V1.0
Project	BRN WMS	Project code	200-WMS-26-001-00
Project period	05/01/26–24/08/26		

1. Purpose

Work product 17 is the running software itself, not a narrative document. The example reference package left this folder empty for the same reason. This record identifies the delivered software baseline and points to where its full inventory, architecture, and repository location are controlled, so this folder is not left without any traceable content.

2. Delivered software identification

Field	Value
Product	BRN WMS (browser-based warehouse management application)
Build baseline	Git HEAD 6c39700 — Add interactive script to generate root .env for docker-compose (17/08/26)
Repository	See Project Repository (work product 9), origin — <code>git@188.166.228.62:nok/wms-app.git</code>
Backup	See Project Repository (Backup) (work product 10)
Component inventory	See Software Components (work product 14)
Architecture	See Software Design (work product 12)
Configuration-item baseline	See Software Configuration (work product 8)
Deployment methods	Manual LAMP install via <code>setup.php</code> , or <code>docker compose up -d --build</code> using the stack in <code>docker/</code>
