

Document	Project Repository	Release	17/08/26 V1.0
Project	BRN WMS	Project code	200-WMS-26-001-00
Project period	05/01/26–24/08/26		

1. Purpose

This record identifies the single authoritative repository that stores BRN WMS source code, deployment configuration, and SDLC work products, so that project artifacts can be located, accessed, and audited.

2. Repository identification

Field	Value
Repository type	Git
Primary (authoritative) remote	origin — git@188.166.228.62:nok/wms-app.git
Default branch	main
Access	SSH key-based Git authentication

3. Repository contents

Area	Path	Contents
Application source	app/	PHP application: login/onboarding, inventory/warehouse, orders, accounting, reporting, barcode
Realtime/scheduled services	nodejs/	Socket.IO notifications and scheduled stock/GL jobs
Deployment	docker/, docker-compose.yml, .env.example, setup.php	Container build, environment generation, one-shot database setup
Demo/seed data	demo_seed*.php	Representative demo data population scripts

Area	Path	Contents
SDLC work products	sdlc/	ISO/IEC 29110 PM and SI work products (this document's own folder)
Supporting scripts	scripts/	Project support scripts
Landing/front pages	landing/	Public-facing pages

4. Repository management

The repository is managed solely through Git; there is no separate document-management system for source code. SDLC work-product Markdown and generated HTML are version-controlled in the same repository as the application source, under `sdlc/`. Exported PDF copies of PM work products are kept outside the repository at `C:\Users\TL\Documents\200-WMS-26-001-00\1-PM Process (10 Work Product)`.
